Summary

Results-driven B.Tech Computer Science student (3rd year) with a strong foundation in full-stack web development, data structures, and algorithms. Proficient in the MERN stack and C++, with hands-on experience building responsive, scalable web applications through internships and independent projects. Adept at translating complex requirements into clean, maintainable code. Seeking a software engineering role to contribute to impactful, high-performance products.

Professional Experience

PG Tech — *Web Development Intern*

Remote | June 2025 – Aug 2025

- Designed and delivered multiple production-ready, responsive websites, improving user engagement through clean UI/UX practices.
- Gained hands-on expertise in the full software development lifecycle—from requirement gathering and prototyping to deployment on cloud platforms.
- Collaborated with a cross-functional team to integrate third-party APIs and optimize front-end performance, reducing page load times.
- Applied modern web technologies (HTML5, CSS3, JavaScript) to build pixel-perfect, cross-browser-compatible interfaces.

Vital Skills — *Python Programming Intern*

Remote | June 2024 – Aug 2024

- Strengthened core programming competencies in Python, focusing on algorithmic thinking and applied problem-solving techniques.
- Developed a fully functional Snake Game with real-time graphics rendering using the Pygame library, demonstrating proficiency in event-driven programming.
- Built a feature-rich Calculator application with a GUI interface, incorporating arithmetic, scientific, and history-tracking functionalities.
- Completed structured training in Python fundamentals including OOP, file I/O, and exception handling.

Technical Skills

Languages	C++, JavaScript (ES6+), Python, HTML5, CSS3
Frameworks	React.js, Node.js, Express.js, Tailwind CSS
Databases	MongoDB, LocalStorage / Browser DB
Tools & Platforms	Git, GitHub, VS Code, Vercel, Render
CS Fundamentals	Data Structures & Algorithms (DSA), OOP, REST APIs

Projects

Bella Vista — **Hotel & Restaurant Management Platform** | HTML, CSS, JS, EmailJS

2026

- Architected a full-featured hotel and restaurant web platform with modules for table reservations, online food ordering, and customer account management.
- Integrated EmailJS to enable serverless email notifications for booking confirmations, eliminating the need for a dedicated backend mail server.
- Engineered a smooth, SPA-like navigation experience using vanilla JavaScript, resulting in a seamless user flow across all modules.
- Managed persistent client-side state via a local database layer, ensuring data consistency across page reloads without a backend.

- Developed an interactive stock trading simulator that displays live-style market data, enabling users to practice trading strategies risk-free with virtual currency.
- Implemented a user profile and portfolio tracking system, allowing real-time monitoring of holdings, trade history, and profit/loss metrics.
- Designed a responsive, intuitive UI adhering to financial dashboard conventions, improving data readability and user retention.

Real-Time Weather Forecasting Dashboard | HTML, CSS, JavaScript, OpenWeatherMap API

2025

- Built a dynamic weather dashboard that fetches and renders live meteorological data—temperature, humidity, wind speed, and weather conditions—via RESTful API integration.
- Implemented asynchronous data fetching using the Fetch API with robust error handling for network failures and invalid location queries.
- Delivered a clean, responsive layout that adapts gracefully across desktop, tablet, and mobile viewports.

Education

B.Tech — Computer Science & Engineering

Baddi University of Emerging Sciences and Technology, Himachal Pradesh

2023 – Present

CGPA: **9.09 / 10.0**

Class XII — CBSE (Science)

Jawahar Navodaya Vidyalaya, Mau, Uttar Pradesh

2022

Score: **81%**

Achievements & Leadership

- **Best Innovation Award** — Recognized for outstanding innovative contribution at a National-Level Hackathon, competing against 100+ teams from across India.
- **3rd Place, Tech Fest Coding Contest (2025)** — Secured a podium finish in a competitive programming contest at university tech festival.
- **National Hackathon Participant — Tech Sageathon 2.0** — Represented university at a national-level hackathon organized by SIRT, Bhopal, developing a solution under a 24-hour constraint.
- **SAARTHI Ambassador — UGC Initiative (2024 – Present)** — Selected as a university-level SAARTHI Ambassador under the University Grants Commission (UGC), mentoring fellow students on academic and career development pathways.
